

M10 MODULE TEST - PROTECTED REVIEW

RC2 | Numeric controls + governance diagnosis | Not a Gate answer key

Open only after a genuine saved Module Test attempt. Diagnose your own evidence chain; do not copy this review into the first attempt.

Protected numeric controls

Control	Expected
Completed denominator	100
Returned numerator	33
Overall Returned / Completed	$33 / 100 = 33.00\%$
North	$7 / 28 = 25.00\%$
South	$10 / 20 = 50.00\%$
East	$5 / 30 = 16.67\%$
West	$11 / 22 = 50.00\%$
Completed revenue total	516,000
Privacy-flag rows shown in aggregate	18
Key contradiction	East has highest completed revenue and the lowest return/completed rate; "highest revenue = problem" is not supported.

Strong PROPOSE -> VERIFY -> JUDGE chain

- **PROPOSE:** AI may draft a plan, calculations, code or wording from approved aggregates.
- **VERIFY:** independently recompute denominator-sensitive rates, compare regions, inspect any generated formula/query, and check claim-to-source fit.
- **JUDGE:** a human analyst owns intervention priority, privacy approval, causal language and final communication.
- **Privacy:** the case does not justify uploading customer-email rows. More data is not automatically more permissible data.
- **Causality:** duration and returns can co-move because of complexity, category mix, staffing, queue mix or selection. Association alone does not identify mechanism.
- **Reproducibility:** keep approved source/aggregate snapshot, definitions, calculations/code, validation evidence, source log, correction log and final decision outside the chat transcript.

Diagnostic repair map

Failure pattern	Return only to
AI role or human decision ownership unclear	AIA0
Prompt lacks outcome/scope/definitions/checks	AIA1
Accepts file/table answer without recomputation	AIA2
Generated code accepted without rule/boundary tests	AIA3
Facts and hypotheses mixed / no stop rule	AIA4
Citation authority/freshness does not fit claim	AIA5
Unsafe data sharing / product setting treated as permission	AIA6
Rewrite changes verified facts or causal strength	AIA7
Learns buttons but not permission/review/rollback controls	AIA8
Final evidence depends on hidden transcript	AIA9

Fresh retry contract

Close this review, repair only the named weak competency, and solve a changed case. Keep the first attempt and retry separately. A copied control value is not evidence of mastery.
