

M09 MODULE TEST - PROTECTED REVIEW

RC2 | Controls + evidence-chain diagnosis | Not a Gate answer key

Open only after a genuine saved Module Test attempt. Compare the evidence chain before copying any wording. Close review before changed retry.

Protected numeric controls

Control	Expected
Total tickets	400
Overall SLA	275 / 400 = 68.75%
Overall escalation	66 / 400 = 16.50%
North	SLA 85.00%; escalation 10.00%
South	SLA 60.00%; escalation 20.00%
East	SLA 90.00%; escalation 8.00%
West	SLA 60.00%; escalation 20.00%
Unweighted mean of regional SLA rates	73.75% - incorrect as the overall rate because region volumes differ
South + West share of volume	270 / 400 = 67.50%
South + West combined SLA	162 / 270 = 60.00%

Strong evidence chain

- **Decision frame:** choose the first limited-scope intervention, not "fix SLA everywhere."
- **Priority:** South and West are both weak at 60% SLA / 20% escalations and together hold 67.5% of ticket volume; West alone is the largest volume pool.
- **Nuance:** North/East perform materially better, so the issue is concentrated rather than uniformly company-wide.
- **Causal boundary:** longer handle time is associated with weaker SLA here, but case complexity, staffing, queue mix, channel mix or escalation rules may drive both. Do not claim handle time caused the misses.
- **Recommendation:** a limited pilot in West and/or South is defensible if it has an owner, measurable SLA/escalation success rule, handle-time guardrail and stop/continue criterion.
- **Defense:** target rate and volume together. West is not prioritized simply because it has more tickets; it also has a materially worse rate.

Diagnostic repair map

Weak output	Return only to
Starts with charts / no decision or Definition of Done	IBA1
Rate denominator/grain unclear	IBA2
Analyzes every cut instead of prioritizing	IBA3-IBA4
Association written as cause	IBA5
Finding lacks comparison, magnitude, scope or implication	IBA6
Recommendation lacks owner/metric/risk/stop rule	IBA7
Memo buries decision under method	IBA8
Slides have topic titles/decorative charts	IBA9
Defense changes metric definition to win argument	IBA10
Chain is not traceable end-to-end	IBA11

Fresh retry contract

Repair only the failed competency, close this review, then solve a changed mini-case. Keep the original attempt and changed retry as separate evidence; copied control values are not mastery.
