

M02 internal-QA evidence

Clean beginner-first regeneration checkpoint. No Course 1 release claim is made.

Canonical lessons	11/11 + M-XLA project
Learner book	44 pages; 11 lesson spans each contain all 16 required stages
Contents / internal routes	12 clickable destinations: EFA1-EFA11 + M-XLA
Current primary/reference links	11 clickable lesson sources
Practice workbook	29 sheets with explicit My_Pivots / My_Report / project output areas
Stale route cleanup	P-EFA2_IFS and P-EFA8_9_Pivots removed
Protected practice review	13 pages; post-attempt + changed-retry control
Gate A / B / C	Retail / Support / Subscription; distinct data and scenarios
Gate protected reviews	3 pages each with protected expected controls + diagnostic rubric
Static QA	115/115 PASS
PDF render/preflight	68 rendered pages; no blank or out-of-bounds text
Workbook/container checks	Practice + A/B/C ZIP/OOXML CRC pass; no unintended formula-error tokens

Defects found and corrected

Missing Pivot/report output sheets

The inherited workbook instructed the learner to use My_Pivots and My_Report, but those sheets did not exist. The rebuilt workbook now contains both and routes EFA8/EFA9 explicitly.

Misleading EFA2 sheet name

The inherited practice tab used P-EFA2_IFS although the lesson teaches SUMIFS/COUNTIFS/AVERAGEIFS. The canonical tab is now P-EFA2_ConditionalAgg and the stale internal instruction was removed.

EFA1 visual segment gap

The earlier 0:00-3:46 segment stopped exactly as the multi-condition IF section began. The current lesson mapping is 0:00-4:45 so the assigned visual covers the AND/OR competency actually taught.

Scanner false positive

A whole-book heading-count test counted some M-XLA house-style headings as extra lesson headings. It was replaced with the stronger per-lesson three-page check; EFA1-EFA11 all contain the complete 16-stage contract.

Workbook render boundary strips

Some Artifact Tool renders show a black strip outside the sheet used content at the requested render boundary. Re-rendering and cell/content inspection show no learner cell content is missing; this is treated as a renderer boundary artifact, not an Excel workbook cell defect.

Release boundary and remaining blockers

Live Excel Desktop simulation

Still pending before Course 1 release: build/refresh PivotTables, test slicer Report Connections, execute Power Query refresh on changed input, and create/manage the EFA11 relationship where the learner's Excel edition exposes the UI.

Mentor synchronization

Pending by design. The Mentor will be regenerated only after all module file names, page numbers, practice routes and Gate paths are stable.

Remaining Course 1 modules

M03-M11 still require the same clean beginner-first regeneration and QA.

M02 status

Internal-QA module candidate PASS for static curriculum/document/workbook/package checks. This wording is deliberately not FINAL / CONTENT FREEZE / fully audited.
