

Repair Card 1 - Navigation, structure and formatting

Scope: EF1-EF3

- Check active worksheet and Name Box before typing.
- Restate row grain and rebuild one clean rectangle with one header row.
- Inspect Formula Bar/stored value before assuming a display format repaired the data.
- Fresh retry: create a 5-row subscription table and prove IDs/dates/numbers are usable.

Repair discipline

- Repair the named weak competency only.
- Do not reopen the whole module because one skill failed.
- Close answer material before the changed retry.
- Append the retry as new evidence; never overwrite the failed attempt.

Repair Card 2 - Sort and filter integrity

Scope: EF4

- Undo immediately if values detach from IDs.
- Use the full rectangular range or a real Table before sorting.
- After filtering/sorting, clear filter and compare row count to the starting count.
- Fresh retry: High-priority ticket list, oldest open ticket, then restore all rows.

Repair discipline

- Repair the named weak competency only.
- Do not reopen the whole module because one skill failed.
- Close answer material before the changed retry.
- Append the retry as new evidence; never overwrite the failed attempt.

Repair Card 3 - Formulas and essential functions

Scope: EF5-EF6

- Replace hard-coded arithmetic with cell references.
- Manually recompute one row.
- Check first/last cell of SUM/AVERAGE/MIN/MAX/COUNT ranges.
- Fresh retry: changed product list plus five summaries and an independent SUM control.

Repair discipline

- Repair the named weak competency only.
- Do not reopen the whole module because one skill failed.
- Close answer material before the changed retry.
- Append the retry as new evidence; never overwrite the failed attempt.

Repair Card 4 - References and Tables

Scope: EF7-EF8

- Say which reference should move and which should stay fixed before copying.
- Use \$ only on the shared setting that must remain fixed.
- Confirm Table Design / Table Name to prove you created a real Table.
- Fresh retry: invoice tax rate + ContactsTable on changed data.

Repair discipline

- Repair the named weak competency only.
- Do not reopen the whole module because one skill failed.
- Close answer material before the changed retry.
- Append the retry as new evidence; never overwrite the failed attempt.

Repair Card 5 - Charts, explain-back and Gate route

Scope: EF9 / Gate

- Choose chart by question: category comparison vs ordered time.
- Check chart source range and labels before interpreting.
- Describe what the chart shows before suggesting any cause.
- Gate B/C are not automatic: use only after failed previous Gate + review/repair + explicit assignment.

Repair discipline

- Repair the named weak competency only.
- Do not reopen the whole module because one skill failed.
- Close answer material before the changed retry.
- Append the retry as new evidence; never overwrite the failed attempt.
