

M01 internal-QA evidence

Clean regeneration checkpoint. This is not a Course 1 learner release.

Canonical curriculum	9/9 EF lessons retained in correct order
Beginner teaching contract	16/16 stages x 9 lessons present
Learner book	34 pages; no blank/out-of-bounds pages
Contents / lesson pages	EF1 p6 -> EF9 p30; mastery p33; revision p34
External source links	7 current primary placements clickable
EF3 / EF4	Deliberately book-led; no filler video added
EF7 source repair	Verified current primary promoted; legacy companion retained
Practice workbook	EF1-EF9 + Mini-Lab + Evidence_Log + Mastery_Tracker
Formula-error scans	0 errors in practice and Gate workbooks
Real Excel Table	DemoOrders persists in XLSX OOXML
EF9 chart route	Guided chart is learner-built; no phantom embedded chart claim
Gate scenarios	A Retail / B Hotel / C Clinic; changed contexts

Assessment, packaging and release boundary

Gate rule

A clean Gate A pass ends. B/C require failure + protected review/repair + explicit assignment.

Critical failures

Hard-coded formulas, broken record integrity, wrong fixed reference, fake Table, wrong ranges/chart, missing validation or explain-back block a pass.

Protected reviews

Practice + Gate A/B/C reviews are separate files and explicitly post-attempt only.

Evidence discipline

Evidence_Log is append-only; retries do not overwrite previous attempts.

Workbook containers

Practice + Gate A/B/C pass ZIP/OOXML container CRC.

PDF preflight

All six PDFs open; no blank pages or text beyond page bounds.

Timer language

No 25:00/Pomodoro requirement appears in M01 learner-facing artifacts.

Mentor boundary

Mentor is intentionally not synchronized yet; stable whole-course file/page routes are required first.

Release boundary

M01 may be an internal-QA module candidate after manifest/hash parity. Course 1 remains unreleased.
