

Protected technical controls - ParcelFlow

Control	Expected
Delivered rows	32
On-time rate	0.375
Total delivered value	109118.35

1. Use of controls

Use these only to diagnose the saved attempt. Correct denominator/grain and independent validation matter more than memorizing the number.

Hiring-evidence diagnostic

2. Portfolio/resume

Claims must be truthful, links working, strongest project relevant to role and every skill defensible.

3. Walkthrough/technical

Project explanation includes grain/quality/validation/limitation. Technical case states denominator and uses an independent check.

4. Behavioral/professional

Answer is specific and truthful; project examples are labelled projects; interviewer questions show role understanding.

5. Salary/logistics

No invented salary/offer facts. State what is known, what you would research/clarify and a truthful logistics response.

6. Fresh retry

A clean Gate A pass ends M11 content competency. Gate B only after failed A + saved attempt + Review A + targeted repair + explicit assignment. Close this review, repair the named competency and append changed evidence.
