

Repair 1 - Portfolio proof & project selection

Scope: PCH1-PCH2

- Map every claim to evidence.
- Different projects should prove different stories/methods.
- Remove tool stuffing and unsupported skill claims.
- Prefer smaller validated project over decorative screenshot pile.

Repair discipline

- Keep failed/partial artifact.
- Repair earliest broken evidence link.
- Close review before changed retry.
- Revalidate downstream resume/README/interview claim after repair.

Repair 2 - GitHub / README / publish QA

Scope: PCH3-PCH5

- Repo must explain itself unaided.
- README starts with business decision, not learning diary.
- Reconcile README numbers and current files/screenshots.
- Scan for broken links, secrets/private data and stale outputs.

Repair discipline

- Keep failed/partial artifact.
- Repair earliest broken evidence link.
- Close review before changed retry.
- Revalidate downstream resume/README/interview claim after repair.

Repair 3 - Final capstone

Scope: PCH6

- Preserve Orders_Raw.
- Log exact duplicate/unknown key/invalid discount/blank Region/malformed date.
- State metric definitions and treatment by metric.
- At least two independent reconciliations; no unsupported causality.

Repair discipline

- Keep failed/partial artifact.
- Repair earliest broken evidence link.
- Close review before changed retry.
- Revalidate downstream resume/README/interview claim after repair.

Repair 4 - Resume, profile & applications

Scope: PCH7-PCH9

- Course projects are projects, not employment.
- Every resume/profile skill has evidence.
- Track role fit + evidence + stage + follow-up + reason.
- Tailor by reordering truthful evidence, never fabricating.

Repair discipline

- Keep failed/partial artifact.
- Repair earliest broken evidence link.
- Close review before changed retry.
- Revalidate downstream resume/README/interview claim after repair.

Repair 5 - Interviews

Scope: PCH10-PCH12

- Project walkthrough includes grain/quality/validation/limitation.
- Technical answer states definition/grain and validation.
- Behavioral example labels project honestly.
- Log error -> correct concept -> changed retry.

Repair discipline

- Keep failed/partial artifact.
- Repair earliest broken evidence link.
- Close review before changed retry.
- Revalidate downstream resume/README/interview claim after repair.

Repair 6 - Offers, readiness & Gates

Scope: PCH13-PCH14 / Gates

- No fake competing offers or salary facts.
- Research actual role/company/location before range.
- Apply while improving; evidence board chooses next drill.
- Gate B/C require prior failure + saved attempt + review + repair + explicit assignment; A clean pass ends M11.

Repair discipline

- Keep failed/partial artifact.
- Repair earliest broken evidence link.
- Close review before changed retry.
- Revalidate downstream resume/README/interview claim after repair.
