

Gate B review - Email Subject Line

1. Unlock condition

Open only after a genuine Gate workbook attempt is saved. This review provides acceptance controls and diagnostic direction, not a pre-attempt solution.

2. Protected objective controls

Control	Expected
Control n	1000
Treatment n	1000
Control rate	0.1000
Treatment rate	0.1050
Absolute lift pp	0.5000
Relative lift %	5.0000
z	0.3686
p-value	0.7124
95% CI low pp	-2.1585
95% CI high pp	3.1585
Support control %	5.5000
Support treatment %	5.4000
Support change pp	-0.1000

Business/guardrail decision and repair route

3. Business threshold

Minimum worthwhile effect = 1.00pp. Business threshold met = False. Guardrail max increase = 0.80pp. Guardrail breached = False.

4. Expected decision

DO NOT CLAIM A WIN: evidence/business threshold is insufficient.

5. Critical interpretation checks

Correct p-value language; CI as compatible uncertainty range/procedure; percentage-point units; no significance=importance shortcut; guardrail cannot be ignored; data/design quality overrides attractive point estimates.

6. Fresh retry / state

Gate B is remediation-only; clean B pass ends M08; C only after failed B + Review B + targeted repair + explicit assignment. Close this review, repair the named competency on changed evidence, and keep the original attempt.
